

VERLANDO AKBAR NUGRAHA

SOFTWARE ENGINEER

Bandar Lampung, Indonesia | verlandoakbar77@gmail.com | wa.me/6283134633181 | blogme-two.vercel.app

PROFESSIONAL SUMMARY

Software Engineer with professional experience since November 2025, working onsite in a private company and involved in the development of web, backend, frontend, mobile, and infrastructure-related projects. Experienced in designing and developing REST APIs, deploying and maintaining applications, managing VPS environments, and working with Docker, PM2, Nginx, and PostgreSQL.

Experienced in backend development using PHP, JavaScript, TypeScript, Golang, C#, .NET, and ASP.NET, with experience building APIs and application services for different project requirements.

Experienced in networking and ISP-related systems, including FreeRADIUS, PostgreSQL-based authentication, MikroTik/Winbox, PPPoE, and integration with network infrastructure such as OLT. Also experienced in mobile application development, game development using Unity and Construct 3, Roblox game map development, and 3D asset creation using Blender.

Comfortable working independently or as part of a development team, with experience using GitLab and GitHub for version control, collaboration, and project management.

TECHNICAL SKILLS

- **Programming Languages:** PHP, JavaScript, TypeScript, Golang, C#, C++, Java, Kotlin
- **Web & Backend:** Laravel, CodeIgniter 4, Node.js, React.js, .NET, ASP.NET, REST API
- **Mobile:** Flutter, Android Studio
- **Database:** PostgreSQL, MySQL
- **DevOps & Deployment:** VPS, Linux, Docker, PM2, Nginx
- **Networking:** MikroTik, Winbox, FreeRADIUS, PPPoE, OLT
- **Game Development:** Unity, Construct 3, Roblox Studio
- **3D:** Blender, 3D Asset Creation
- **Version Control:** Git, GitLab, GitHub
- **Tools:** Figma, Android Studio, Linux, Microsoft Office, Google Workspace

PROFESSIONAL EXPERIENCE

Software Engineer

Nov 2025 – Present

Private Company — Onsite

- Develop and maintain software systems across backend, frontend, and mobile platforms based on project requirements.
- Design and implement REST APIs for integration between frontend, backend, mobile applications, and external services.
- Develop backend services using technologies including Laravel, Node.js, Golang, .NET, and ASP.NET.
- Deploy and maintain applications on VPS environments using Linux, Docker, Nginx, PM2, and PostgreSQL.

- Develop database structures, queries, authentication systems, and application business logic using PostgreSQL and MySQL.
- Work with networking-related systems involving MikroTik, Winbox, FreeRADIUS, PPPoE, and PostgreSQL-based authentication.
- Contribute to projects involving ISP infrastructure, including integration between application systems, RADIUS authentication, routers, and OLT infrastructure.
- Troubleshoot application, server, database, networking, and deployment issues across development and production environments.
- Collaborate with team members while also independently handling assigned features and technical problems.

Freelance Programmer

2023 – Present

Self-Employed

- Developed websites, backend services, APIs, and mobile applications according to client requirements.
- Developed applications using Laravel, CodeIgniter, Node.js, React.js, .NET, ASP.NET, Golang, Flutter, and JavaScript.
- Designed and implemented APIs for communication between frontend, backend, mobile applications, and external services.
- Managed application deployment and server configuration for selected projects.
- Communicated directly with clients to understand requirements, provide technical solutions, and deliver project features.

Full Stack Developer Intern

Jul 2024 – Sep 2024

PT Microdata Indonesia

- Developed a Laravel-based Inventory Management System.
- Implemented backend functionality, database operations, authentication, CRUD features, and application logic.
- Collaborated with frontend developers to integrate backend APIs with the user interface.
- Performed debugging, testing, and troubleshooting to improve application reliability.

NETWORKING & INFRASTRUCTURE EXPERIENCE

ISP / RADIUS Management System

Professional Project

LARAVEL, POSTGRESQL, FREERADIUS, MIKROTIK, WINBOX, PPPOE, OLT, NGINX, LINUX

Developed and maintained a web-based ISP management system integrated with MikroTik routers, FreeRADIUS authentication, PostgreSQL, PPPoE services, and OLT infrastructure. The system supports customer management, authentication, service profiles, and automated network-related processes.

SELECTED PROJECTS

Gallery Keripik Lampung

Sep 2025

LARAVEL, JAVASCRIPT, MYSQL, BOOTSTRAP, REST API

E-commerce platform for Lampung traditional snack products, including product management, interactive user interface, logistics integration, and payment API integration.

Inventory Management System

Jul 2024

LARAVEL, MYSQL, BOOTSTRAP

TeknoNews App & Website

Jun 2023

FLUTTER, FIREBASE, LARAVEL, JAVASCRIPT

Mobile application and web platform for technology and campus news, including bookmarking and notification features.

Game Development Projects

Personal / Academic Projects

UNITY, CONSTRUCT 3, C#, ROBLOX STUDIO, BLENDER

Developed game projects using Unity and Construct 3, created game environments and maps using Roblox Studio, and produced 3D assets and supporting game resources using Blender.

EDUCATION

Bachelor of Informatics

2021 – 2025

Universitas Teknokrat Indonesia — Faculty of Engineering and Computer Science

CERTIFICATIONS & ACHIEVEMENTS

- **Certifications (2024):** Web Programmer, Service Oriented Programmer, Information Security, Basic Artificial Intelligence II, Senior Game Developer.
- **Achievement:** 2nd Place Academic Expo (2024).
- **Professional Experience:** Full Stack Programmer Intern at PT Microdata Indonesia.

PROFESSIONAL COMPETENCIES

- Problem Solving
 - Technical Troubleshooting
 - Critical Thinking
 - Technical Documentation
- Team Collaboration
 - Independent Work
 - Effective Communication
 - Time Management
